46 - If you would like to make additional comments about the course or instruction, please provide the feedback. You might elaborate on the particular aspects you liked most as well as those you liked least. Also, how can the course or the way it was taught be improved?46. Please provide your feedback.

Christopher Castille

Response Rate 12/23 (52.17%)

- I loved the class. The active learning approach helped me understand all of the concepts. I also like how you didn't do multiple choice questions for exams if we were happy with our quiz grades. Your focus was our learning and if we understood what you were saying, which was great. Some things that were hard to do were all of the readings. I don't think you need to take them out because they were mostly interesting and informative. The ones with the math were a tad confusing lol. It was just hard to read 3 chapters within one week on top of everything else. I got it done, but I felt like I was just trying to get through them. Also, I think it made others skim over the chapter rather than fully understanding what the authors were presenting. I don't have a solution for this, but maybe you can think of something. Overall, I learned a lot from this class.
- Awesome Professor!! Cares a lot about his students and always wants to help out.
- I feel like the only significant negative of Dr. Castille and this course was the workload. I feel like it was simply just too much. Other than that, everything was very good.
- This is a great and effective class. The workload is really heavy but its worth it. Dr.Castille is a great teacher and person.
- He is a great teacher and is very enthusiastic towards the materials he teaches. The only downfall is that sometimes the workload of this class can become overwhelming. I would personally say that I had to put more effort into this class than BSAD 490. I would also say that sometimes the instructions that were given were confusing also and could have been worded better for us to understand.
- A lot of work, but overall, it has allowed me to learn at a quicker pace and not get stuck for as long on certain things.
- The course is VERY course heavy and a large workload. Personally wishing I would have taken other classes before taking this one to have a better understanding of certain topics and assignments that were asked of me. This course was harder than most for me and truly a struggle during certain sections.
- I enjoyed this class overall very much. One of my favorite things you did as an instructor is giving us the assignment prior to Tuesday's class to assess our understanding of the material and giving us the opportunity to learn main points of the content we would begin discussing in class. Sometimes it felt overwhelming, but having that understanding before made the lecture easy to follow. I learned a lot in this class, and the content covered is information that will be beneficial to me in my career. Definitely one of my favorite classes I have taken at Nicholls.
- Dr. Castille is different from all professors i have ever had. He is respectful of his students and their time. He is extremely prepared for class and educated on subject matter. He really gets excited to see us apply our knowledge in the real world. He pushes us to think outside of the box and achieve to be productive and successful. I will always remember his advice and his class.
- This course is very challenging, and could be improved by information provided being more directly to quiz questions, and therefore exams. Independent readings are difficult when trying to find the answers on own. But, the professor puts in great effort to explain and elaborate after independent work. He clarifies information and explains in concepts that are much easier to understand. Professor cares very much about students understandings, and more importantly about how we will use this information in our daily lives. i think every professor and course should care more about how we will utilize skills learned in the next step of our lives .
- Simulation + excels bring a lot of value to students (real-life situations)! I saved the worksheets since they are so great. In my view, Tableau & RStudio doesn't teach us much (a little less relevant) and confuses the class more than anything. I feel that you did a great job with the simulation and excels and should focus more on this; less material would allow students to understand it better. Shorter, less extensive readings would also allow us to better understand the content of what we read. Thank you for this great semester.
- Dr. Castille is such an intelligent professor. Always willing to help and very understanding.
